INTRODUCING
TOMORROW'S WAY TO PAY

FINGOPAY

FORGET CONTACTLESS
GO CARDLESS

VEINID

FingoPay uses a **Biometric map** of the **vein structure** within **your finger**

Linked to a **credit card**, it allows **shoppers to pay** by simply placing **their finger** on a scanner

FingoPay has **already been used** at concerts and nightclubs, with plans to **roll out** to **restaurants** and **retailers**

It can take **8 months** to conduct a fraud investigation

FingoPay is **fast, accurate,** and **secure** — **reducing the risk** of credit card fraud

See how VeinID is developing tomorrow's way to pay
